FACT SHEET NOVEMBER 2026

Learn about the Fauntleroy/Wildwood Bike Lanes

Map of Fauntleroy Way SW and SW Wildwood Pl, with a dark blue bar showing our work zone

Following a fatal crash that occurred on this corridor earlier this year, we began working to improve safety for all travelers. Using our new Fatal Crash Review process, our plan is to make safety upgrades based on our findings.

Since August 2026, we have:

- Removed parking spots on both sides of Fauntleroy Way SW and SW Wildwood Pl, between Director Street and 46th Ave SW
- Used asphalt and rubber sealant to smooth the street surface ahead of bike lane installation
- Performed Metro coach test to inform project design

By the end of 2026, we plan to:

- Install Protected Bike Lanes on both sides of Fauntleroy Way SW and SW Wildwood Pl
- Install all-way stop signs and two marked crosswalks at the Fauntleroy/Wildwood intersection
- Relocate on-street Passenger load zones south of the Ferry Terminal into the parking lot and reconfigure parking spaces to provide more short-term parking

How you can prepare:

- Plan for more traffic and detours in December
  - ➢ We may close half of the street at a time
  - ➢ If Fauntleroy Way SW is your usual northbound/southbound route, consider using 35th Ave SW as a temporary alternative
- Prepare for more parking on side streets
  - ➢ The project will require space on both sides of the street
  - ➢ We may temporarily restrict access to some driveways during construction
- Be patient with our construction impacts
  - ➢ There will be noise, dust, vibrations, and equipment in the area

More updates to come:
